Canister (Single-Flush) Toilets

CLASS SIX® KOHLER®
CLASS FIVE® KOHLER®

If you have a single-flush canister toilet, you will not see a flapper in the tank but a cylinder-shaped flush valve. These toilets do not use a flapper, but a seal. ***If your toilet is leaking water into the bowl, the seal needs to be replaced, not the flush valve.***

New!
AquaPiston
*AquaPiston canister allows water to flow into the bowl from all sides (360 degrees), increasing the power and effectiveness of the flush.

(bolts)

For detailed parts listings, see pages 12-17.

Canister (Dual-Flush) Toilets

DUAL FLUSH KOHLER®

If you have a dual-flush toilet, you will see a two-button actuator on top of the toilet rather than a trip lever. Inside the tank you will not see a flapper but a cylinder-shaped flush valve. These toilets do not use a flapper, but a seal.
If your toilet is leaking water into the bowl, the seal needs to be replaced, not the flush valve.

YOUR CAP COLOR DOES NOT MATTER.

Use GP1138930

Flush Valve Seal
